CONSTRUCTION PRACTICES AND PROCEDURES MANUAL

construction projects often have significant health and safety requirements due to regulatory oversight. Since these requirements can impact the design of a project, the Department of Environment, Health and Safety (EHS) prepared this EHS Laboratory Design Guide to aid the campus community with planning and design issues.

Laboratory Design Guidelines - Facilities Services

This manual describes the test procedures that are currently in use in the Material Laboratory of the Construction Section. Methods of testing fall into four main groups: 1. Those which follow a national standard (not included in this manual). 2.

LABORATORY MANUAL OF TEST PROCEDURES FEBRUARY

INTRODUCTION The construction of laboratory facilities requires oversight. Regulatory requirements must be addressed and good practice must be considered. Laboratory facilities have architectural, space planning, HVAC, environmental control, and fire/life safety requirements not generally found in most types of construction.
